KATLANIR CAM BALKON

Özellikle balkonları evin bir parçası haline getiren katlanır cam balkon sistemleri uygulandığı alanın şeklini alarak kolay kullanım ve rahat temizlik imkanları sunmaktadır. Camlama sistemlerinin içinde en yüksek izolasyon, minimum yağmur ve rüzgar geçirgenliği sayesinde balkon olmak üzere kış bahçesi , teras gibi alanlarda tercih edilmektedir. Sistem Çalışma Şekli; Panellere sağa veya sola doğru hareketi ile çıkış parkurunda içe doğru açılarak üst üste katlanması ile sistem açılır.

Lockwin olarak kullanılan katlanır sistemlerinin eksikliklerini göz önünde bulundurarak kullanım amacına bağlı olarak alternatif sistemler ürettik. Patentli tasarımı olan Plus Kol Mekanizması ile sistemin uygulandığı alanda daha güvenli ve kullanışlı hale getirildi.

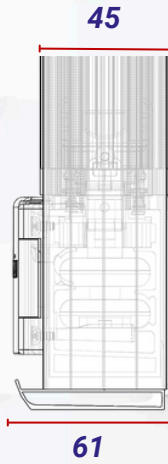

FOLDING SERIES

Folding glass balcony systems, which make balconies a part of the house, offer easy use and comfortable cleaning opportunities by taking the shape of the area where it is applied. Thanks to the highest insulation, minimum rain and wind permeability among the glazing systems, it is preferred in areas such as balconies, winter gardens and terraces. How the system works; The system is opened by folding the panels on top of each other by opening inward on the exit track with the movement to the right or left.

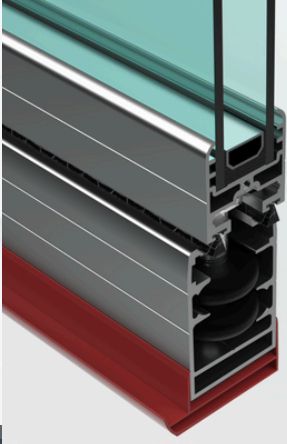

Considering the shortcomings of the folding systems used as Lockwin, we have produced alternative systems depending on the intended use. With our patented design Plus Arm Mechanism, the system has become safer and more useful in the area where it is applied.

**Teknik özellikler**

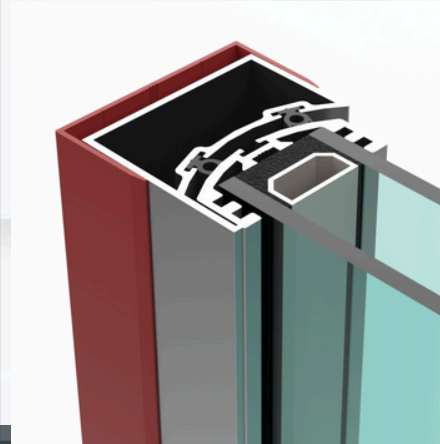

Alüminyum Profiller	EN6063 T4
Profil renk seçeneği	ELoksal(naturel),bronz,elektrostatik rall boyalı, ahşap kaplama
Cam seçeneği	30mm kombinasyonlu ısıcam
Taşıyıcı rulman	Delrin kaplama 608zz rulman
Maksimum yükseklik	2600mm
Panel genişlik	350-800mm
Yalıtım	UV Katkılı Kıl fitil, conta

**Technical specifications**

Aluminum Profiles	EN6063 T4
Profile color option	Anodized (natural), bronze, electrostatic rall painted, wood veneer
Glass option	30mm combination glass
Carrier bearing	Delrin coated 608zz bearing
Maximum height	2800 mm
Panel width	350-800mm
Insulation	UV Additive Bristle roving, gasket

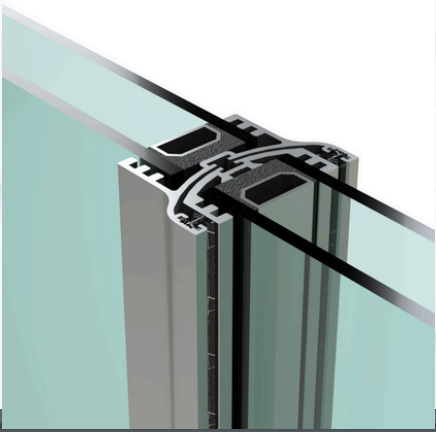

Damlalıklı alt kasa
Bottom case with dropper

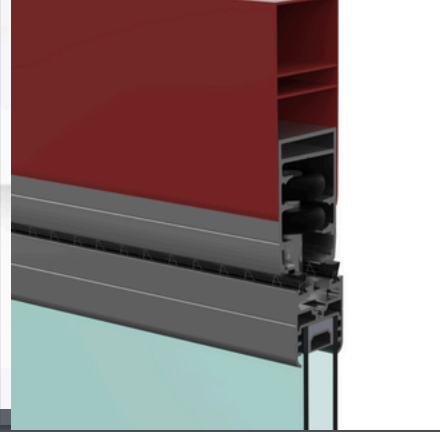

Ayarlı yan kasa
Adjustable side frame

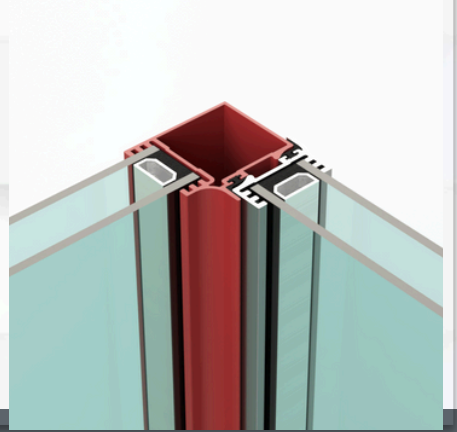

Kol profil detay
Arm profile detail

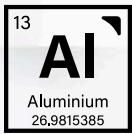

Ara birleşim
Adjournment

Ayarlı perdelik seçeneği
Adjustable profile option
